The UK's largest independent mounting kit manufacturer, we supply everything for the valve industry except valves and actuators

The Better Alternative

Introduction

Pro-kits Ltd are the UK's largest independent supplier of mounting kits and associated products to the valve industry. We have amassed over 85 years of combined experience in supplying our wide range of products to an international customer base.

Our manufactured products are made in accordance with our ISO 9001 2008 accreditation at our purpose built 11,000 square foot factory, we use the latest CNC machines to ensure our parts are right every time. All our designs are produced in house by our trained AutoCAD staff; and can be backed up with calculations to give you peace of mind.

We also provide a range of ancillary products to complement our manufactured goods; these include worm gears, bevel gears, switchboxes, solenoids, chain wheels and positioners.

Please see our product overview on the following pages; our sales team will be happy to assist you in pricing help or information on any of these items.

Mounting Kits

At Pro-kits Ltd we produce a vast array of standard ISO and bespoke mounting kits to suit our customer's requirements. These can be from valve to actuator, actuator to switchbox/positioner and valve to switchbox to name but a few, these can range from a small 1/8" valve up to a 60" valve. All mounting kits are able to be manufactured in carbon steel or stainless steel grades 304/316. Not only do we cater for conventional kits, we also supply tandem kits, valve linkages, accessory brackets and much more.

Pedestals and Extensions

We can design and manufacture pedestals and extensions to your specific requirements in both mild steel and stainless steel. Pedestals can be supplied in any length with varying lengths of extension spindle below; this can be fitted with universal joints and supported with the aid of wall mounted guide brackets.

Our fully supported extensions can again be made to any length to suit any valve with calculations to prove their suitability.

For specific enquiries please call our sales team.

Positioners / Chainwheels

Pro-kits Ltd are pleased to have been associated with the PMV range of positioners since the start of the company, we keep a range of standard units on the shelf and supply bracketry to suit whatever actuator they require fitting to. Other manufactures can also be supplied if specified.

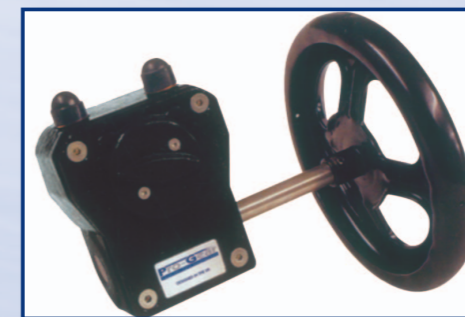

We keep chain wheels in stock at Pro-kits Ltd, these units clamp on to the existing hand wheel of the valve or gearbox making it quick and easy to retro fit. They come in many sizes to suit hand wheel diameters from 50mm to 800mm diameter and are zinc plated for protection. Chain to suit these can be supplied in any length and again is zinc plated. Stainless steel chain wheels can also be supplied, please call for details.

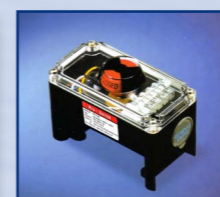

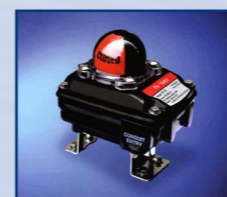

Worm and Bevel Gears

Pro-gear worm gears are a range of gearboxes suitable for all quarterturn applications such as dampers, ball, butterfly and plug valves. These are all used in industries like petrochemical, HVAC waterworks and oil and gas. Torques range from 200Nm to 12000Nm broken down in to 8 units. Please see our specific catalogue for more technical information. We can also supply boxes suitable for far greater torques, please ask if you have a requirement.

Pro-gear Bevel gears are a range of gearboxes suitable for multiturn applications such as gate, globe and parallel slide valves, torques range from 500 to 2000Nm from stock and larger on request, again please see our specific catalogue.

Switchboxes

Available from stock Pro-kits Ltd have two models of switchbox available the Pk100 and the Pk120. The PK100 having an Aluminium enclosure and the PK120 polycarbonate, both have 2x V3 SPDT micro switches as standard and are IP67 rated. They are designed to mount directly to any VDI VDE actuator.

Other switchboxes are available covering a wide range of applications.

Solenoids

Pro-Kits Ltd are pleased to continue their association with RGS Electro Pneumatics in the form of RGS plus Ltd.

RGS Plus Ltd is the stocking division of RGS, here we keep stocks of valves and coils, this giving us the ability to offer a vast amount of configurations to suit most requirements, off the shelf.

The range includes standard safe area as well as EExd, EEx IA, EEx N, and EEx M coils which can all be fitted to either Namur or remote mount bodies.

Please call us for prices and current stock availability.

Spring Return Levers/Inserts/Locking Devices

The Kinetrol Spring return lever is another product stocked in abundance here at Pro-Kits Ltd, we keep two models the 05 and 07. The 05 has a maximum torque capability of 24Nm and the 07 unit 44Nm, these can be supplied with mounting kits to suit any quarter turn valve falling within this torque range. We also have the ability to De-torque the 05 unit to suit valves with low torque values.

For changing the size of female or male ISO squares we keep a range of Sintered steel inserts, these can be used to reduce the size of an actuator drive or to increase the size of a square on a coupling. The sizes are 11x9, 14x9, 14x11, 17x11, 17x14, 22x17 and 27x22mm, please call for prices.

Locking devices can be designed and manufactured at Pro-Kits Ltd to suit almost any valve, we keep stocks to suit common ball valves and butterfly valves, we also produce them for multi turn valves in various forms to match the customers requirements. Locking devices also take a more sophisticated turn in the form of interlocks with single keys or full site systems and lock out devices for actuated packages, we have many options available so please call us to discuss your particular needs.

Everything for the Valve and Actuator industry except Valves and Actuators
